19 As the need for this Plant is not very urgent I would suggest that the consideration of this proposal may be deferred. Purchase of Serum and other causes have adversely affected the budget expectation and all avoidable expenditure has to be deferred. I am not also sure of as much as Rs 5000 (initial + working costs) can be spared from the mulberry grant of Rs 10,000

WD 0569—GPB—40,000—31-7

As it is proposed to purchase this plant, I have to urge the following points for consideration.

How will the addition of this plant affect the financial side of the breeding operations of the department? There is no information on this important point in the file. All that the Superintendent states is that "there is no doubt that the advance made in our breeding and grainage sections would have been vastly greater if we had had a Refrigerator and now the work has grown to such dimensions that we can no longer manage it with the cold storage make shifts now employed". It may be that the expansion of the operations requires mechanical appliances. But are these operations to be conducted so as to pay their way or, ~~if~~ even if they result in a loss? If loss is to be permitted, the questions how long are they to be allowed and to what extent in each year have to be considered. The following figures show the operation outlay and operation receipts

year.	Charges. Rs.	Receipts. Rs.
23-24.	~~28,571~~ 64057	7,122
24-25.(Revised)	~~28,400~~ 66200	8,000
25-26. (Budget)	~~25,577~~ 59900	8,000

In view of the wide divergence between t charges and receipts, I think it is first nec to determine what is the financial policy acc to which these breeding and farm operations should be carried on before additional cost on new equi

Serial No

equipment for expanding or improving them is incurred. As regards the annual [illegible] Rs 550 it is stated that it will be more than repaid

29 I find it difficult to understand how a ch of Rs. 5,000 is expected to be met from the pro of about Rs 10,000 for mulberry leaves. The e penditure on the purchase of mulberry leaves an other items was being clubbed in the previous y and the total charges on all these connected it in each of the previous two years was about Rs But the corresponding provision in the Budget f the current year is only about Rs 25,500. How in the face of these facts it is stated that an additional expenditure of Rs 5,000 can be met from the reduced grant of about Rs 25,500 is a point which requires explanation but the papers do not contain any information about it.

30 As regards the argument that "more than the sum required for this might be realised by chargin for serum", I have to state that it remains to be seen how much will be realised on this account. In any case, ~~whatever is realised~~, the net charge on account of serum is an addition to the budgeted programme of expenditure and such addition is bound to affect adversely that programme.

Calls for further particulars in the matter

Letter no. Rev. 133 A 8.12.1925 from the Director of Agri. stating that the Refrigerating plant is necessary for better Controlling of the egg production and increasing the output.

43 Submitted for perusal and orders - in reference to paras 27-30, 35 and 39.

44 The Director is of the opinion that the plant is necessary for better Control of the egg production and increasing the output. But Govt. says in para 5 of the letter, that out of Rs. 4400/- required for the purchase of the plant, only 2000/- can be spared from "Mulberry Leases" and that there is no provision in the Budget this year from which money could possibly be re-appropriated

REV. SECRETARIAT
-NOV 1925
IES & COMMERCE
RANCH

Serial No

45 Three chief points were raised in my note dated 17th October 1925:-

(1) To what extent will the purchase of this plant ~~will~~ improve the financial side of the operations of the Department?

(2) Can the expenditure for the purchase of this plant be met from the provision in the current year's budget for "Purchase of seed cocoons"?

and (3) Why is there such large difference between operation outlay and receipts of the Farms of this Department?

46 The Department is unable to give any answer to question No.(1).

47 As ~~xxxxxx~~ regards question No.(2), what is stated in paras 5 and 6 of the Superintendents letter is not quite clear to me. If it means that no more than Rs 2,000 could be spared for this purpose, it is not possible to purchase the plant this year as the proposed sanction to the purchase was conditional upon the money being found from sanctioned grants. If, however, the whole cost for the purchase of the plant and for working it in the current year can be met by reappropriation, sanction may be conveyed.

48 The Superintendent's answer to the third question is that the excess of expenditure over realisations is a "feature which the Sericultural Department possesses in common with all Departments which do scientific, experimental, educative and propagandist work; it may perhaps be regarded as the price which the country pays fo

Serial No

page 6- Lawrence

the improvement and progress of its greatest s subsidiary industry." Admitting that the work o the Department is of the highest value, it is impossible to permit excess of expenditure ove realisations without any limit whatever. The figures I have quoted in my note dated 17th Oc ber 1925 show that such excess is more than ha a lakh of rupees every year. The fixing of a limit for this excess is an absolutely neces sary condition financially. I would suggest t it may be fixed at Rs 50,000 per annum for the next two years.

49 Whether the Farm operations of the Depar ment must necessarily result in a loss of half lakh of rupees every year, is a point on which am not in a position to express any opinion an it is worth while investigating into it. If s loss is the inevitable result of the opera- tions and if there is equivalent benefit in so form or another, it will have to be permitted. The figure of Rs 50,000 proposed by me is simpl with the object of placing a limit upon such e cess expenditure. The need for a limit is obvious.

51 The Director of Agriculture request at the instance of the Sericultural Superintendent, sanction to the purchase of a Refrigerating Plant @ a cost of Rs. 4400. The plant is said to be very necessary for the better Controlling of egg production and increasing the Silk output. In view of the important of this plant, its purchase was urged at the Sericultural Conference also.

52 When the file was sent to the Financial Secretary on 30th Sept. 1925 Suggested that the consideration of the proposal may be deferred as a sum of Rs. 5000 (initial and working cost) Could not be spared for the limited grant of Rs. 10,000/- for mulberry bana The Deman was however pleased to observe that he had no objection if it Could be met from Sanctioned grant

53 When the file was later on referred to the Financial Secy, he wanted information on the following three points:

(i) To what extent the purchase of this plant will improve the financial side of the Operations

(ii) Can the expenditure for the purchase of this plant be met from the current years grant under "Purchase of Cocoons

WD 01264—GPB—40,000—17-12-25
App. F. III—2]

General and Revenue Secretariat

Sen File No. of 1925 (14

Serial No.

(iii) Why is there such a large difference between Operation outlay and receipts of the Farms of this Department?

The replies have been given by the Director of Agriculture have been analysed in the Financial Secy. note of 6.1.25 S/4 The Financial Secy. is of opinion that the purchase of the plant may be sanctioned if the amount may be met by re-appropriation, ~~and that it is therefore impossible to purchase this year if more than Rs 2000 the full amount~~ and raises the question of limit up to which the Agricultural Dept. can incur expenditure in excess of realisations and suggests the limit of Rs. 50,000/- per annum for the next two years.

5/5 The net expenditure for the last three years is as follows:

1922-23	Rs. 96,045
1923-24	72,182
1924-25	71,800.x

R. A. Secy.) 13/1

5[8] The note contained in para 51 has been set up in accordance with the Hon'ble members orders in para 50.

5[9] There are two points for orders here:

(1) Sanctioning the Purchase of a Refrigerating Plant.

The view expressed in the file is that this may be sanctioned if the cost (about Rs. 4500) can be met out of Sanctioned grants. The Supdt. of Sericulture says he can find out Rs. 2000.

(2) Fixing a limit of Rs. 50, as to the loss on the Farm Operations of the Sericultural Dept.

PP. 13-14

93 The facts of the case have been set forth in paras 51-54 of the notes.

94 This file relates to the purchase of a Refrigerating (cold storage) plant for use in the Sericultural Department at an approximate cost of Rs. 5000/. The plant is said to be very necessary for the better Controlling of eggs produced and thereby increasing the silk output.

95 The Director first submitted the proposal in July 1925 and for want of adequate funds, the purchase of the plant was not sanctioned during 1925-26. The question was again urged at the time of considering the budget estimates for 1926-27, but was not sanctioned in Council. The plant is reported to be an item of urgent necessity and the Director has again asked for a grant of Rs. 5000/- for the purpose. [The file containing this proposal, among others, is pertinent for reference in another Connection.] The necessity for the plant was urged both at the June Session of the Rep. Assembly, 1925 and at the Chamarajpet Sericultural Conference in Dec. 1924.

Submitted for orders.

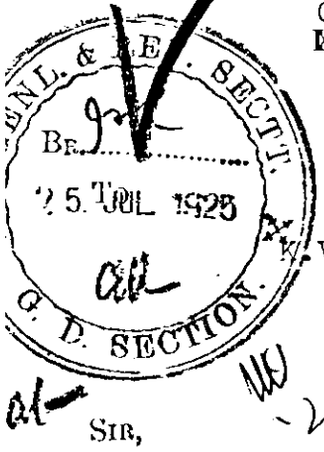
Seri G-25-11

FROM

G.H.Krumbiegel, Esq., F.R.H.S., A
Offg. DIRECTOR OF AGRICULTURE IN MYSORE,
BANGALORE.



K.V.Anantaraman, Esq., B.A.,
Secretary to the Government of Mysore,
Revenue Department. Bangalore.

SIR,

I have the honour to forward herewith a copy of letter No 69 dated 11th July 1925 with enclosed illustration received from the Superintendent of Sericulture, Mysore, and to request that early ---- sanction of Government may be kindly obtained for purchase of the plant from the Brunswick-Kroeschell Co., at an approximate cost of Rs.4400/- including cost of transport etc, the expenditure being met from the provision of Rs.10,138/- under Mulberry Leaves in the current year's Budget.

I have the honour to be,
Sir,
Your most obedient servant,

Offg.Director of Agriculture.

Letter No.69 dated 11th July 1925 from the Superintendent of Sericulture in Mysore, Mysore to the Director of Agriculture in Mysore, Bangalore.

Refrigerating Plant.

I have the honour to state that an efficient refrigerator is a necessary part of the equipment of the department; not only for ordinary grainage purposes, but for the very important breeding work which is essential for the progressive improvement of the Silk-Worm reared in Mysore. There is no doubt that the advance made in our breeding and grainage section would have been vastly greater if we had had a refrigerator: and now the work has grown to such dimensions that we can no longer manage it with the cold storage makeshifts now employed.

I submit herewith an illustration, with specification, of a refrigerator and ice making out-fit suitable for our purpose. It is made by the well known Brunswick-Kroeschell Co.,(please see No.O.B.D. in illustrated leaflet) and is designed to give a temperature ranging down to 0° C in the cooling chamber. It can also produce ice- which can be sent down to the other farms for use in cold storage of eggs.

The cost of the refrigerator is Rs.3,867 and the cost of a 1½ H.P. Engine (the power required) Rs.325/- making Rs.4,192/- for the outfit. Cost of transport etc., might be about Rs.200/- more, making a total ---- expense of Rs.4,392 or 4,400/-.

I propose to attach the outfit to Channanatna Farm, where the greater part of our breeding and experimental work will be concentrated./ The cost may be met out of the provision of Rs.10,138/- under mulberry leaves in the Budget for 1925-26. I request that early sanction of Government might be obtained, in order that I might take steps in good time to get out the plant.

"C o p ;

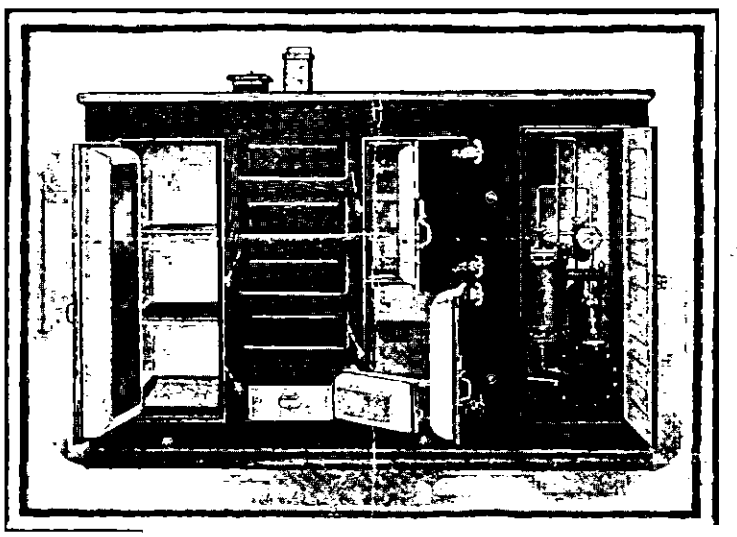
PORTABLE REFRIGERATING AND ICE MAKING MACHINES



Manufactured by

BRUNSWICK-KROESCHELL COMPANY

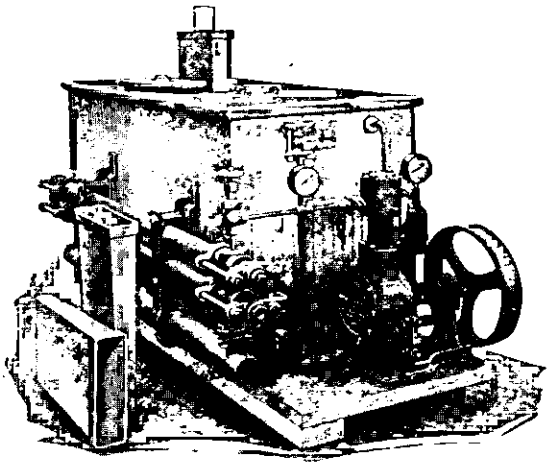
Main Office

NEW BRUNSWICK, N. J., U. S. A.

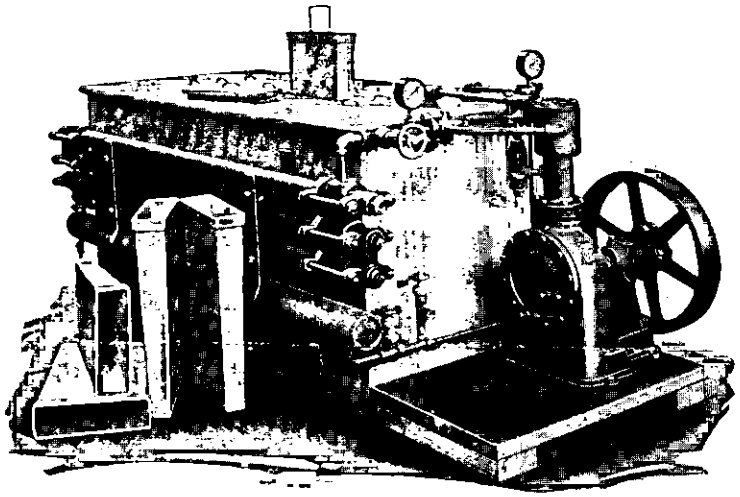
CABLE ADDRESS:—"NAWATUBC" NEW BRUNSWICK, N. J., U. S. A.

BRUNSWICK-KROESCHELL COMPANY

Portable Ice Making Machines



No. 1 B. D.



No. 2 B. D.

Capacity:

270 lbs. (120 kgs.) of ice in 24 hours operation.

135 lbs. (60 kgs.) of ice in 12 hours operation.

Specifications:

Number of ice cans—6; weight of block 22½ lbs. (10 kgs.); size 12 in. x 3 in. x 21½ in.

Power required—1 H. P.

Measurements—Length 7 ft. 6 in.; width 2 ft. 6 in.; height 3 ft. 6 in.

Amount of common salt required for making brine—130 lbs.

Code word—ZABAM.

Capacity:

540 lbs. (240 kgs.) of ice in 24 hours operation.

270 lbs. (120 kgs.) of ice in 12 hours operation

Specifications:

Number of ice cans—12; weight of block 22½ lbs. (10 kgs.); size 12 in. x 3 in. x 21½ in.

Power required—2 H. P.

Measurements—Length 9 ft.; width 3 ft.; height 3 ft. 6 in.

Amount of common salt required for making brine—250 lbs.

Code word—ZABEN.

DESCRIPTION

Each of the above machines is shipped assembled complete in one piece, ready to operate and make ice. It is only necessary to charge with ammonia, connect power and water, and to fill the tank with brine made from common salt. No special foundation is necessary as the compressor is mounted on same base with tank.

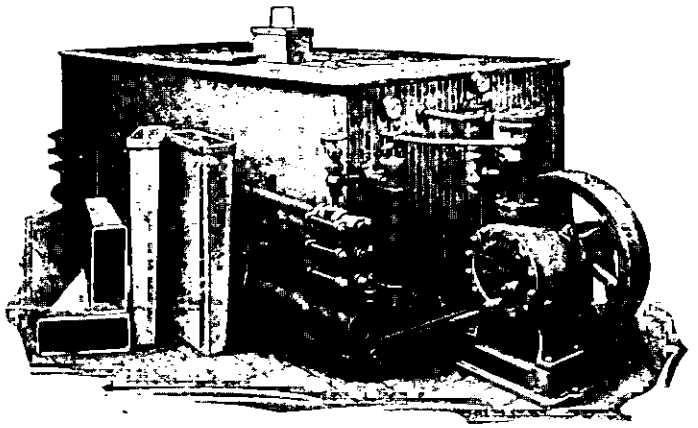
All material is of the best quality. The ice making tank is equipped with individual covers for each ice can and is well insulated—lumber, waterproof insulating paper, and pure granulated cork, being used. The tank is made of substantial welded steel plates. The freezing coils are of special ammonia pipe, continuous electric welded. The ice cans are of durable construction, well galvanized.

There is also included an ample supply of lubricating oil; can lifter; hydrometer for testing brine; valve tags; and complete illustrated instructions for operating the machine.

A compact, economical, practical ice-making machine, designed for real service.

BRUNSWICK-KROESCHELL COMPANY

Semi-Portable Ice Making Machine



No. 3 B. D.

Capacity:

1100 lbs. (500 kgs.) of ice in 24 hours operation

550 lbs. (250 kgs.) of ice in 12 hours operation.

Specifications:

Number of ice cans—15; weight of block, 55 lbs. (25 kgs.) size 5 in. x 14 in. x 32 in.

Power required—3 H. P.

Measurements: Complete plant – Length 14 ft.; width 4 ft. 2 in.; height 4 ft. 6 in.

Tank and insulation only—Length 10 ft.; width 4 ft. 2 in.; height 4 ft. 6 in.

Amount of common salt required for making brine—850 lbs.

Code word—ZABIP.

DESCRIPTION

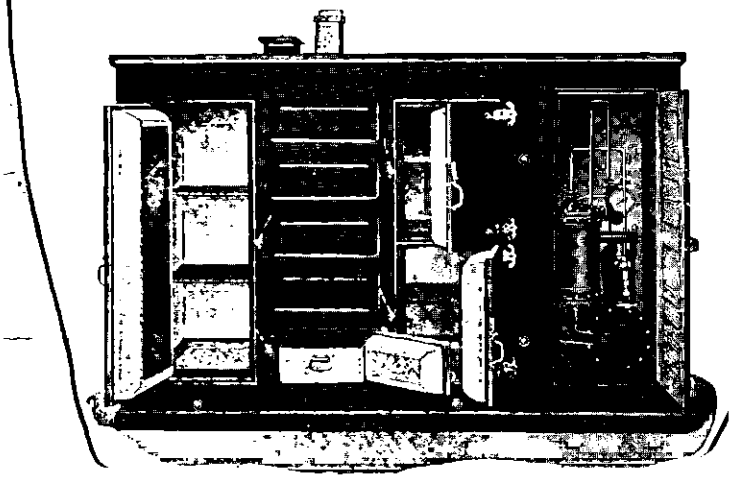
Because of the weight and difficulty of shipping in one piece, No. 3 B. D. is shipped in two packages, the compressor being packed separately. The piping is cut and ready to connect, and the parts are marked so that they can be easily and quickly connected, by bolting the flanges together. When pipe connections are made, it is only necessary to charge with ammonia, connect power and water, and fill the tank with brine made from common salt.

All material is of the standard BRUNSWICK quality, the same as described for machines Nos. 1 B. D. and 2 B. D.

Complete illustrated instructions are furnished for installing and operating the machine.

This machine is ideal for the large country estate, mining camp, plantation, or small commercial business.

Portable Combination Refrigerating and Ice Making Machine



No. 0 B. D.

Capacity:

This machine operating from 8 to 10 hours daily will produce from 15 to 20 pounds (7 to 9 kgs.) of ice, and maintain a constant low temperature in the refrigerator.

Specifications:

Size of compartments, each—Width 18 in.; depth 22 in.; height 50 in.

Power required—1 H. P.

Measurements—Length 94 in.; width 34 in.; height 64 in.

Code word; spruce lined refrigerator—ZABSY.

Code word; glass lined refrigerator—ZABUR.

DESCRIPTION

This equipment is shipped complete, as illustrated, ready to operate when charged with ammonia and connected to water and power.

Refrigerator—finished in selected golden oak; hardware, —heavy solid brass, nickel plated; insulation—5 in. thick best cork and lumber construction. The inside lining of the refrigerator may be either spruce wood, finished with white enamel paint; or if desired, the refrigerator may be lined with opal glass, and the floor finished with white ceramic tiles.

The machine is designed both to cool the refrigerator by means of pipes from the machine to a temperature 10° to 20° lower than is obtained by cooling with ice and to make enough ice for use on the table, etc.

Complete operating instructions are furnished.

An economical and sanitary installation for the country or city home, small hotel or restaurant.

The Brunswick System

THE BRUNSWICK system of ice making or refrigeration is the well known and universally adopted ammonia compression and expansion system,—the refrigeration or freezing being produced by the expansion of anhydrous ammonia through pipe coils placed in the compartments to be cooled; or in the case of the ice making plants, submerged in brine in the ice tank. This brine is cooled to a low temperature, and in turn cools and freezes the water in the ice cans or moulds, which are submerged in brine.

The principal working parts of the plant consist of the following:—

The *COMPRESSOR* which pumps and compresses the ammonia gas.

The *CONDENSER* in which the compressed ammonia gas is cooled and liquefied by circulating water.

The *AMMONIA RECEIVER* in which the liquefied ammonia is stored.

The *EXPANSION VALVE* through which the liquid ammonia is pumped and expanded through the cooling coils, and back again to the compressor. Plants described in this bulletin are furnished with either the BRUNSWICK hand controlled expansion valve or the BRUNSWICK automatic expansion valve. Code words and prices given for standard plants include hand expansion valve. Price sheet shows extra price for furnishing automatic expansion valve. Code word for automatic expansion valve—ZACAN.

The ammonia is compressed and expanded over and over again,—a new supply being required only once every year or so if the plant is properly operated.

The machine may either be operated by day only (8, 10 or 12 hours) or if a greater amount of ice is required or lower temperatures in the refrigerator, it may be operated continuously.

The perfection of the BRUNSWICK is the result of over 20 years experience in the manufacture of small refrigerating and ice making machines. The essential features of the BRUNSWICK are simplicity, durability, and efficiency. Each individual part is designed to operate or serve its purpose to the best possible advantage. The name "BRUNSWICK" stands for perfection in design, material, and workmanship from the compressor throughout the whole system.

The BRUNSWICK machine is recognized by the leading engineers of the world as the most perfect and economical ice making or refrigerating machine of small and medium capacity. The BRUNSWICK machine has long since passed the experimental stage, and by years of service has earned its place at the head of all machines of its kind.

The plants described in this bulletin have the same high standard of material and workmanship as our larger plants.

A more complete description of the BRUNSWICK system of refrigeration and construction of the BRUNSWICK compressor and auxiliaries will be found in supplementary booklets and literature, which will be mailed upon request.

AMMONIA

We recommend that with plants Nos. 0-B. D., 1-B. D. and 2-B. D., 25 lbs. of ammonia be ordered and 50 lbs. for No. 3-B. D. This ammonia should last for two or three years with the 0-B. D. and 1-B. D. plants, and for a year or more with the 2-B. D. and 3-B. D. plants, with proper care in the operation of the plant.

BRINE

The brine for the ice tanks of plants described herein is made from common salt dissolved in water. A small amount of salt will have to be used at intervals to keep brine at proper density, however, this item amounts to very little in cost.

WATER

With condensing water at not over 80° F. (26° C.), the following quantities per minute should be circulated through the ammonia condensers; Nos. 0-B. D. and 1-B. D.—½ gallon; No. 2-B. D. —1 gallon; No. 3-B. D.—2 gallons.

POWER

BRUNSWICK plants may be operated by any convenient type of power. Prices will be quoted upon request on direct or alternating current electric motors, gasoline, oil or steam engines. We can furnish plants described herein direct connected to steam engines, if desired.

SIR,

With reference to your letter No.I.C.1357/Seri.6-25-2 date 5th August 1925, requesting the cost of upkeep and maintenance of the Refrigerating plant, I have the honour to state that it is reported that there is no cost of "up keep" or "maintenance". The cost of working the plant comprises-

Cost of 25 lbs. of Ammonia (which will last for 2 or 3 years)	about Rs. 100/-
Cost of running the 1½ H.P. oil engine for 8 hours a day, for 200 days, at 0-4-0 an hour	400/-
Contingencies	50/-
	Rs. 550/-

(This may be met out of the grant under "Mulberry Leaves" and will be more than repaid by the increased volume of production in the grainages).

I have the honour to be,

Sir,

Your most obedient servant,

Offg.Director of Agriculture.

over

As regards the annual cost of working the plant estimated @ Rs: 5'0/- it is stated that it will be more than repaid by the increased volume of production in the granages". I am to observe that this is an indefinite statement and gives no idea of the financial effect of the additional expenditure. Govt. are not prepared to sanction such items of expenditure unless they are convinced that the money invested brings in additional income or a result thereof.

~~It is stated in your letter No. Doc. 133 A of 26th July 1928 that the cost of the plant may be met from the provision of Rs: 10,138/- under "Railway Fence" in the~~ In regard to the sum indicated for meeting the cost of the plant, in the current year's budget, Current year's budget. I am to point out that the expenditure on 'Mulberry leaves' and other items during each of the previous two years is to about Rs: 29.000/-

G. R. S. G/55]

GENERAL AND REVENUE SECRETARIAT.

(Continuation sheet draft form.)

while the corresponding provision during the current year is only about Rs. 25,5

How, ~~in this fact appears that~~ it is stated that an additional expenditure of about Rs. 5'00 can be met from the reduced grant ~~of about Rs. 25,500~~ for the current year, as proposed, is point which requires to be explained.

Lastly I am ~~directed~~ to enquire whether the purchase of the plant cannot be deferred for the present

The favour of an early reply is requested.

provision. Increase of Rs 1000/- is unexpected in current up to date, and what is the amount available as surplus for the purchase of the plant — ?

By I am to request you to furnish me at the earliest the urgency to purchase this plant this year along with your views on the large divergence between operation outlay and receipts ~~Speech of~~ the Secretary Supply Dept.

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE,

General and Revenue Secretariat,

Dated, Bangalore, 3/11/192 5

No. Dc 2949
Sec. 6-25-4

From

B. SRINIVASA IYENGAR, Esq., B. A., B.L.,
Secretary to the Government of His Highness the Maharaja of Mysore,
Revenue Department.

To

G. H. Krumbiegel, Esq., F.R.H.S.,

Offg. Director of Agriculture in Mysore.

Sir,

With reference to correspondence ending with your letter No.R. O.C 133 A dated 15th September 1925 regarding the purchase of a Re Refrigerating Plant, I am directed to request you to furnish detailed information on the following points:--

(i) How the purchase of the plant will improve the financial side of the breeding operations of the Department, should be explained.

(ii) As regards the annual cost of working the plant, estimated at Rs.550/-, it is stated that it "will be more than repaid by the increased volume of production in the grainages". Details regarding the present scale of production, expenditure and the anticipated improvement, when the plant is purchased, should be furnished.

(iii) In regard to the source indicated for meeting the cost of the plant in the Current Year's Budget, I am to point out that the expenditure on "Mulberry Leaves" and other items during each of the previous two years amounted to about Rs.29,000/- while the corresponding provision during the current year is only about Rs.25,500/-. How an additional expenditure of about Rs.5,000/- can be met from this reduced grant for the current year as proposed, is a point which requires to be explained.

(iv) Against the grant of Rs.10,000/- under Mulberry Leaves what is the expenditure incurred up to date, and what is the amount available for reappropriation for the purchase of the plant?

(v) Lastly, I am to request you to furnish more details about the urgency for the purchase of the plants this year, along with your opinion on the large divergence between the operation outlay and receipts in respect of the Sericultural Department.

I have the honour to be,

Sir,

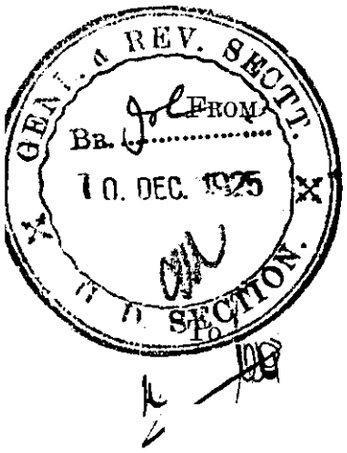
Your most obedient servant,

Secretary to Government,

Revenue Department.

DEPARTMENT OF AGRICULTURE,
MYSORE STATE.

No. Roc.133-A of 25-26. Bangalore, 8th December 1925.



G. H. KRUMBIEGEL, Esq., F.R.H.S.,
Offg. Director of Agriculture in Mysore,
Bangalore.

Seri. 8-25-5.

B.Srinivasa Ayengar, Esq., B.A., B.L.,
Secretary to the Government of Mysore,
Revenue Department, Bangalore.

Sir,

With reference to your letter No.I.C.2949/Seri.8-25-4 dated 3rd November 1925 calling for certain details on the proposal to purchase a Refrigerating Plant, for the Sericultural Department, I have the honour to forward herewith a copy of letter No.1589 dated 14th November 1925 from the Superintendent of Sericulture furnishing full information on all the points raised in your letter under reply. Judging from the general position of the industry, I am of the opinion that the plant is necessary for better controling of the egg production and increasing the output. The supply of disease-free eggs is the most vital part in the improvement of Sericulture. At present it is not advisable to sell eggs at a higher rate than the usual price charged by rearers, nor would it be good policy to make the production of eggs a source of profit or even pay itself for some time.

I have the honour to be,

Sir,

Your most obedient servant,

Offg.Director of Agriculture.

Letter No.1589 dated 11/14th November 1925 from the Superintendent of riculture in Mysore, Mysore, to the Offg.Director of Agriculture in --- sore, Bangalore.

Subject and Reference:- "Purchase of Refrigerating Plant" - Revenue Secretary's letter No.I.C.2949/Seri. 6-25-4 dated the 3rd November 1925.

With reference to the points raised in the Revenue Secretary's letter you on the subject of purchase of refrigerating plant, I have the nour to state:-

Point (i) - The purchase of cold storage plant cannot be regarded as an olated trade deal, which can be justified only by an immediate money in, but rather as a necessary equipment for scientific work, which is soul e very ~~xxxxxx~~ of progress in a technical department. I cannot make any eful forecast of the money profit which might immediately accrue from is plant, as it is scientific apparatus which I have had no opportunity using. In regard to its utility, I can say this - that it is almost necessary in a modern grainage as a microscope -and that its employment ll render possible work of the highest value to the Sericultural Industry the State. It might also lead in course of time, to an increased --- mand for silk-worm eggs and thus result in some direct profit: but how ch profit exactly, it is not possible now to say.

Point (ii) - It is not possible to furnish by anticipation any but an tremely speculative estimate of the increased volume of production which ght result - since that depends on the increased demand from raivats, ich, in its turn, is governed by seasons, prices, and other unforseeable nditions. It may however be safely said that there will probably be increase of more than Rs.550/- a year.

During 1924-25, the total quantity of eggs sold was 3,00,169 lavings the price realised was Rs.3,500/-. The expenditure under seed --- oons was Rs.1,900/-.

oint (iii)-- The provision of apparatus for cold storage is essential the industry is to profit from recent research and experiment: and is refore a step of such preponderating importance that I think money uld be found for it even at the cost of routine expenditure covered by lberry Leaves". The amount now available under cost of mulberry ves after providing for sanctioned and proposed expenditure is only 3,395-5-4; and of this only about Rs.2,000/- can possibly be spared. re is no provision in the budget this year from which money could

[illegible] to reappropriated.

Point (iv) - The amount under mulberry leaves is shown below:-

Amount alloted.	Upto-date expenditure.	Amount already proposed under the head.	Amount a[illegible] ble.
Rs.10,138-0-0	Rs.1,482-10-8	Rs. 5,260-0-0	Rs.3,395-5-4.

6 Point (v) - The preservation and advantageous hatching of eggs, the correct timing of operations dependent on the life - incidents of the silk-worm, all require control of temperature. No experiments requiring uniformity can be conducted without such control. The information now sought has already been furnished by me in letter No.69 dated 13th July 1925. Work with superior races - including breeding operations - would come to grief without this apparatus.

"The large divergence between operation outlay and receipts" is a feature which the Sericultural Department possesses in common with all departments which do scientific, experimental, educative, and propagandi work; it may perhaps be regarded as the price which the country pays for the improvement and progress of its greatest subsidiary industry. This criticism was formally discussed and met at the Session of the Board of Agriculture in India, held at Bangalore in January 1924, where the follow resolution was unanimously passed;

"The Board is of opinion that the essential factor in the working of Government Agricultural Station is the fulfilment of the specific object or objects for which the station is established. While realising that the station is managed as economically as possible the Board is of opini that the financial aspect is of entirely secondary importance, and shoul not be allowed to interfere with the object or objects of the station".

In passing this resolution, the Board adopted in toto the report of the committee which consisted of the Agricultural Adviser to the Governm of India and some of the most illustrious members of the Agricultura services, from which the following passage might be quoted as relevan the matter on hand;

"Seed Farms have to be judged entirely by their results and not their balance sheets. It is difficult, if not impossible to run th t profit, for the reason that though they are small, a well trained

has to be employed to make them effective centres for instruction, seed growing and experiment."

7 It would be fitting to conclude with this weighty pronouncement by His Highness the Maharaja himself in opening that Session:

"There is a very natural desire on the part of every one in India to-day that expenditure on the machinery of Government should be cut down to the minimum, but the expectation that experimental farms should, and can, be made to pay must have arisen from a misunderstanding of the functions of these Farms.

"Experimental Farms, should, it seems to me, be looked upon as outdoor laboratories where you seek for definite information.....the State maintains these Farm laboratories for the investigation of the --- problems connected with its main industry - Agriculture. , . . it --- appears to me extremely unwise and short-sighted to lay emphasis on the money-making side of the experimental farm . . Certainly an Agricultural Department should be judged not by the money returns obtained from the farms under its control, but by the influence it exerts on the Agriculture of the State."

I request that early orders might be obtained.

"C O P Y"

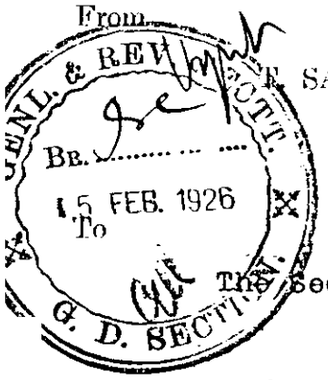
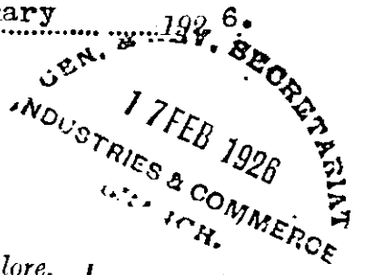
OFFICE OF THE COMPTROLLER TO THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

No. GAD. 612.

Bangalore, Dated... 13th February 192 6.





From

K. SATYARAJ CHETTY, Esq., B. A.,
Comptroller to the Government of His Highness the Maharaja of Mysore,
Bangalore.

To

The Secretary to the
Government of Mysore,
Agriculture and Other Departments,
B a n g a l o r e.

Sir,

With reference to your letter No. I.C.4981/Seri.6-25-7 dated 21st January 1926, I have the honor to state that out of the sum of Rs.14,400 provided for salaries of Director under Live Stock Section of the Agricultural Department in the current year's budget, a sum of Rs.1,354-13-0 has been utilised towards the salary of Mr. Davison for the period of his service in the State, a sum of Rs.6,318-15-0 has so far been appropriated under orders of Government for certain items of expenditure of the Department not provided for in the Budget and Rs.3,176-12-0 is required to meet the cost on account of salaries of the present officer in charge of the Live Stock Section. There is still a balance of Rs.3,549-8-0 left and information as to whether this amount is available for further appropriation may be kindly obtained from the Director of Agriculture in Mysore.

I have the honor to be,
Sir,
Your most obedient servant,

K. Satyaraj Chetty.
Comptroller.

APP. F. VI. Gl.]

Letter No.Roc.133-A of 25-26 dated 24th February 1926 from the Director of Agriculture in Mysore to the Secretary to Government, Medical & Agricultural Departments.

- - - - -

I have the honour to request you to kindly obtain the early orders of Government for the inclusion of the following items in the coming year's Budget (1926-27) of the Sericultural Department:-

(1) Cold Storage Plant - Rs.5,000/-

The necessity for the purchase of this plant has been explained in my letter No.Roc.133-A of 25-26 dated 24th July 1925 in correspondence on this subject resting with this office No.Roc.133-A of 9th February 1926.

(2) Deputation for foreign training - Rs.5,000/-

It is proposed to depute Mr. K. Shamsuddin Khan for foreign training. The matter has already been submitted for sanction in my letter No.C.1120-A of 24-25 dated 31st January/2nd February 1925.

(3) Purchase of machinery - Rs.3,000/-.

The purchase of an adequate pumping outfit for the use of the Kunigal Farm is necessary as the Petter's portable outfit there is not powerful enough to manage the lift and is therefore proposed to be transferred to Bidadi.

(4) Purchase of Domestic Basins 60 at Rs.250/- each Rs.15,000/-.

This is in the nature of an advance for the manufacture of Domestic Basins for sale to the public. The basins have stood all tests most successfully and are in great demand.

(5) Sericultural Demonstrations - Rs.1,000/-.

The important part of the propagandist work of this Department is the organisation of demonstrations of improved methods, races of silk worms and machinery during jatras and the provision of Rs.1,000/- is necessary to meet expenses incidental to such demonstrations like running temporary sheds purchase of cocoons etc.

It is therefore necessary to provide a sum of Rs.1000/ for this expenditure for the coming year for the reasons explained in my letter No.Roc.674-A of 23rd February 1925.

General and Revenue Secretariat | File No. | of 192 .

Extract from Budget file — vide flag II

Serial No	Scholarships :	Comptroller's Remarks.	Administrative sect's opinion / orders of Member
	Scholarships	Provision made by this office is for such of the Scholarships as are to be Continued.	no proposals for fresh Scholarships have been recd." Comptroller's flg may stand."
	Portable Reeling basins : 15000	The Department says that this is a recoverable item & so the grant may be given under Advances.	May be treated as an advance.
	Seed cocoons + Mulberry Leaves	Provision is based on the Revised	The comptroller's figures may be accepted. The provision under Mulberry Leaves was being reappropriated for several such purposes
	Cold Storage plant-		There is no authority for including provision on the following accounts in the next year's Budget Sericultural Demonstration 1000 Cold Storage Plant 5000 It was included in the consolidated list and disallowed at council meeting.
	Deputations of a Sapor to Northern India.	For deputation of K. Shamsundari	This may be omitted and P A
	Item 6.	no mention in the Budget File.	

Financial Secretary's note in U.O.Note No.Fl.389

The budget having been finally sanctioned there is no question of making any supplemental provision except on consideration of the merits of each case. Item No.5 is being separately dealt with. And likewise the proposals relating to Nos.1 & 4 may be called for and worked up. If additional funds are necessary and the Legislative Council requires to be approached, necessary further action will be taken. Such action is now premature.

As regards item 6 there are no papers in the file. As it is stated to be a sanctioned charge, it may be included in the list of additional grants to be submitted to the vote of the Legislative Council at its next session.
